

## ***Recruiting Participants***

Are you:

- Between 18-55 years old
- Healthy (no medical history of stroke, epilepsy or any neurological disorders)
- Not taking any medication

Then you can:

- Earn up to £30 as participation reward
- Help us improve research into aVNS and Motion Sickness

## **Non-pharmacological management of Motion Sickness Using Auricular Vagus Nerve Stimulation**

Our experiments require you to observe visually grating/rotating and virtual reality videos whilst receiving active **aVNS** (Auricular Vagus Nerve Stimulation), which is safe and non-invasive.

We will also record your brain activity using **EEG** (Electroencephalography), or **fNIRS** (functional near-infrared spectroscopy), and record your heart activity using **ECG** (Electrocardiography).
